

Zybek Engineering and Construction
Division of Zybek Advanced Products, Inc.

Design and Build Construction

Innovation in motion

You have a vision.

Now you have a partner to help you realize it.

Zybek's Design-Build process involves the Engineering and Construction team from concept to completion. Our industrial engineering and construction experience, knowledge of construction costs, scheduling, constructability, availability of materials and equipment are integrated into the design process.

Core Focus

- Complete project management
- Complete design and engineering
- Complete off-site construction of sub-mechanical systems
- Installation and site construction
- Project closeout and project documentation

Design and Build Advantages

- Undivided Responsibility (Single Contract)
- Accelerated Project Delivery
- Cost Savings
- Streamlined Building Process
- Innovative
- Full Cost Disclosure

Specialization: Industrial, Manufacturing and High-Tech Facilities

- Process Equipment Construction and Installation
- Heavy Power Distribution
- Robotic / Automation Systems
- Lab Construction
- Industrial Projects

Company Summary

- Woman owned, Small Business, Established in 1996
- Full CNC machine shop, Welding, Engineering, High Bay Assembly
- Professional Engineers and staff: (P.E. Colorado); M.E., E.E., Ph.D.
- Project Management Institute Members
- Industry Partner – Design - Build Institute of America
